

High Salary Vs Job Satisfaction QA

What I have noticed

- Your starting job, You don't have much choice
  - You have to live with it
- After 1-3 Year, there is opportunity to switch to correct or right company
- Most of the companies lacks in some way, some give great culture but bad work.
  - Some give Good work but terrible culture or Salary
- It is very difficult to find balanced company
  - You will know company was bad or good when you leave it
- Even if you find a great salary + great work
  - You may find Manager who is micro managing
- Job Satisfaction is myth, It is very hard to get it nowadays even if you get it 1-2 year and you will be at same page again
- My 10 Year
  - 1 Year Low Salary Bad work
  - 1-2 Great work + Ok Salary but Bad culture
  - 2-5 Balanced Job but after 2-3 year Same Bad work + Low Salary
  - 5-7 High Salary but Bad work
  - — Wish not to say :D
- Low Salary + Bad Work
  - You are doing something wrong
  - Introspect and change
