How to Earn Back the Lost QA Respect?

Before We Start

4 PRINCIPLES

Informative

- Become a subject matter expert and share your knowledge
- You should have the context of what is going live, what is pending, When it is going live. everything
- Become a active listener.
- QA respect is gained by proving QA testing is a worthwhile cost to the company.

Trustworthy

- Take responsibility and Ownership
- Even if you are against the timelines due to P0,P1 stick to it
- Its Ok to disagree

Adding value

Ask the right questions.

- No such thing as a stupid question
- https://en.wikipedia.org/wiki/No_such_thing_as_a_stupid_question#:~:text=%22(There's)%20no%20such%20thing,than%20pretend%20they%20already%20know.

Stretch your abilities

- Help them to reduce the test case and regression suite with maximum coverage
- Always learning attitude

Focused

- Work, Environment
- To the point report and information share
- KT and clear expectations

Mistakes

- Relax work and no ownership
- Not providing value to the team
- Wrong estimates, bad estimates
- Blame game to dev/ pm/ design /among
- Assuming requirements
- Not exposing the abilities
